

# Week 2 Project Report

|         |                                         |
|---------|-----------------------------------------|
| Project | VaiOS (Basic Secure Android OS Project) |
| Student | Jay Barve                               |
| Week    | Week 2                                  |
| Mentor  | _____                                   |
| Status  | In Progress                             |

## Objectives

- Understand project requirements
- Study Android architecture
- Prepare project plan

## Work Completed

- Collected project requirements
- Researched AOSP and Linux basics
- Prepared project documentation
- Defined project workflow

## Challenges Faced

- Development environment setup
- Understanding AOSP architecture

## Solutions Implemented

- Read official documentation
- Configured development tools

## Learning Outcomes

- Learned Android architecture basics
- Improved documentation skills

## Plan for Next Week

- Complete setup
- Start basic implementation

## Task Status

| Task                 | Status      |
|----------------------|-------------|
| Requirement Analysis | Completed   |
| Research             | Completed   |
| Documentation        | Completed   |
| Development          | In Progress |
| Testing              | Pending     |
